

For the Good of the Public.

Try ALL, and hold fast that which is GOOD.

Dr. STOPANI & Co. the Italian Doctors & Oculists,

From the University of PADUA (who have been upwards of 40 Years in Practice)

At No. 2, CHAPEL-STREET, TOTTENHAM-COURT ROAD,

Undertake to CURE (by the Blessing of GOD) the following DISORDERS, viz.

CANCERS and Fistulas without cutting; Ulcers and White Swellings; the Gout, Rheumatism, and Sciatica, immediate Relief; scorbutic and scrophulous Habits; Ague; Dropsy in all its Stages, without Tapping; Gravel and Stone; Contractions and Relaxation of the Limbs, and stiff Joints; Deafness, and all Disorders of the Eyes; Nervous, Asthmatic and Consumptive Complaints; and the Venereal Disease in both Sexes, if ever so inveterate, perfectly cured in a few Days, without the Use of any Mercurial Preparation, Confinement, or Restraint of Diet, &c. &c.

The rapid Improvements and astonishing Discoveries which Nature has acquired in the Medical Art, may be a sufficient Justification of this Address. Dr. STOPANI and Co. being Foreigners, in Practice in the different Parts of the Globe, do not wantonly sport with the Lives of their Fellow-Creatures, but wish to steer a Course, by avoiding the common beaten Tracks of Empirics, and to investigate with Precision the various Modes of administering Relief, with a liberal Spirit, presume to offer their Services to the Public at large, flattering themselves they have arrived to some considerable Degree of Eminence in the Healing Art, and are determined, by an attentive Care, to remove such Complaints that have hitherto baffled the Skill and Ingenuity of some of the first Practitioners in the Kingdom.

All Patients who are afflicted with external Complaints, it is requisite that they should see and examine them themselves; but those who have any internal Disorders, may bring or send their Morning Urine, when the Complaint will be discovered, and, if curable, proper Medicines administered.—*Facts are stubborn Things.*

Advice and Attendance from 8 in the Morning till 10 in the Evening.

The Doctors may be consulted in Five different Languages, and the strictest Honor and Secrecy may be depended on.—Letters (Post paid) duly attended to, and no others will be received.

All Ruptures, in either Sex or Age, cured without cutting, or the Use of steel Trusses.

N. B. The House has blue Rails before it, and a Lamp in the Passage.

+ **ADVICE GRATIS.**
